

I benefit from listening to XM Satellite radio and it's traffic and weather channels. As a professional truck driver, I have to make timely decisions on avoiding major traffic and weather delays so I can make my deliveries on time. XM Satellite Radio, which is a service that I pay for, provides me with the variety and quality of information and service which is not available on any radio station (try to get a radio station in the middle of the desert). I don't appreciate the National Association of Broadcasters violating my constitutional rights by dictating to me what I can and cannot hear. I urge you to reject the NAB's petition 04-160 and allow XM radio to continue providing me the kind of programming I pay for, demand and deserve!
